

CYBER STALKING *Awareness*

Cyberstalking is a type of cybercrime that uses the internet and technology to harass or stalk a person. It can be considered an extension of cyberbullying and in-person stalking.

Cyber Angels will be holding several programs to raise awarness about the warning signs and available resources related to stalking. Follow 'Protect Yourself 'on Facebook and Instagram to learn more about cyberstalking .

Female identified persons aged 18-24 have been stalked online

The average incident of cyberstalking will last for 2 years and that average almost doubles if it involves people who used to be intimate with each other.

The most common form of cyberstalking is Facebook which 83% of victims stated that they received.
